DESCRIPTION: *Capacitors, *Tantalum capacitors,
Electrical properties, Tantalum, Porosity, Silver,
Electrodeposition, Vapor plating.

A detailed study of the properties of Ta_2O_5 produced by
anodic oxidation of tantalum was made. It could be
shown that the valve effect is mainly due to the presence
of defective areas, probably pores, in the oxide. These
pores can be localized by electrolytic deposition of
silver or by the electrolytic removal of silver de-
posited by evaporation. Gaseous evaporation makes it
